---

## Introduction

YASA Uganda is an energy inclusion start-up that seeks to revolutionize the energy space with a disruptive innovative solution. YASA means “lighting”. Our goal is to bring clean and renewable energy to off-grid communities where conventional electricity does not exist. Our flagship product is a fuel-less energy generator (FEG). It’s a kind of generator which does not use any kind of oil, diesel or petrol to produce energy. It induces motion by the use of a motor that spins the alternator to produce energy. Part of the energy which is produced by the alternator is recycled back to charge the batteries or capacitors that provide the initial charge to the motor to sustain the process.

# **YELLOW FLAGS?**

**Dig into the Due Diligence.  
Q&A to determine if livable.**

# E.g. Marketingspeak

- We reach underserved consumers by connecting production centers to consumer centers and controlling distribution activities to avoid food waste.
- Our supplier service packages that include: instant stocks management, traceability, route optimization, customers attraction, catch buyers, recycling service of that packages consumers purchased with us.

# E.g. Marketingspeak

- We reach underserved consumers by **connecting production centers to consumer centers** and **controlling distribution activities** to avoid food waste.
  - Production and consumer centers? Distribution activities?
  - What does the customer buy?
  - If the entrepreneur can't clearly explain in plain English what they do and why they do it, they are not going to be successful at selling, or marketing, or recruiting.

# E.g. Buzzword Soup

- With our cloud based and A.I. driven platform, we have fully automated the process of renewing vehicle documents in Nigeria & Africa. No middle men.

# E.g. Buzzword Soup

- With our **cloud based** and **A.I.** driven **platform**, we have **fully automated** the process of renewing vehicle documents in Nigeria & Africa. No middle men.
  - Why the use of all the buzzwords?
  - Are they there to lure inexperienced investors?
  - Are they hiding a lack of uniqueness?

# E.g. Uninformed?

- eP.NG is Nigeria's first digital poultry investment platform. A digital agriculture platform that provides debt-free financing, technical skills and mentorship as well as market access to smallholder farmers.

# E.g. Uninformed?

- eP.NG is Nigeria's first digital poultry investment platform.
  - **NOT TRUE**
  - Birdpreneur has been operating in Nigeria for years.
  - Birdpreneur is one of my investees.
  - It's not huge, but if eP.NG can't notice an existing competitor, what else are they not noticing about their market?

# E.g. Team

- I'm the only employee right now, working full-time.

# E.g. Team

- I'm the only employee right now, working full-time.
  - The founder can't find a co-founder?
  - There isn't enough sales to hire anyone part time?
  - The founder can't find anyone who will volunteer?
  - If they can't sell on the employment side, how will they sell to customers, and to other investors?

# E.g. Stale

- 10 years old
- No website?
- \$2,000 in annual revenues?
- With a team!?

2 Website \*  
nil

5 Start date? \*  
Jun 9, 2009

6 Investment to-date?  
\$3.5K

7 Revenues (last 12 months)?  
\$2K

# E.g. Noisy Financials

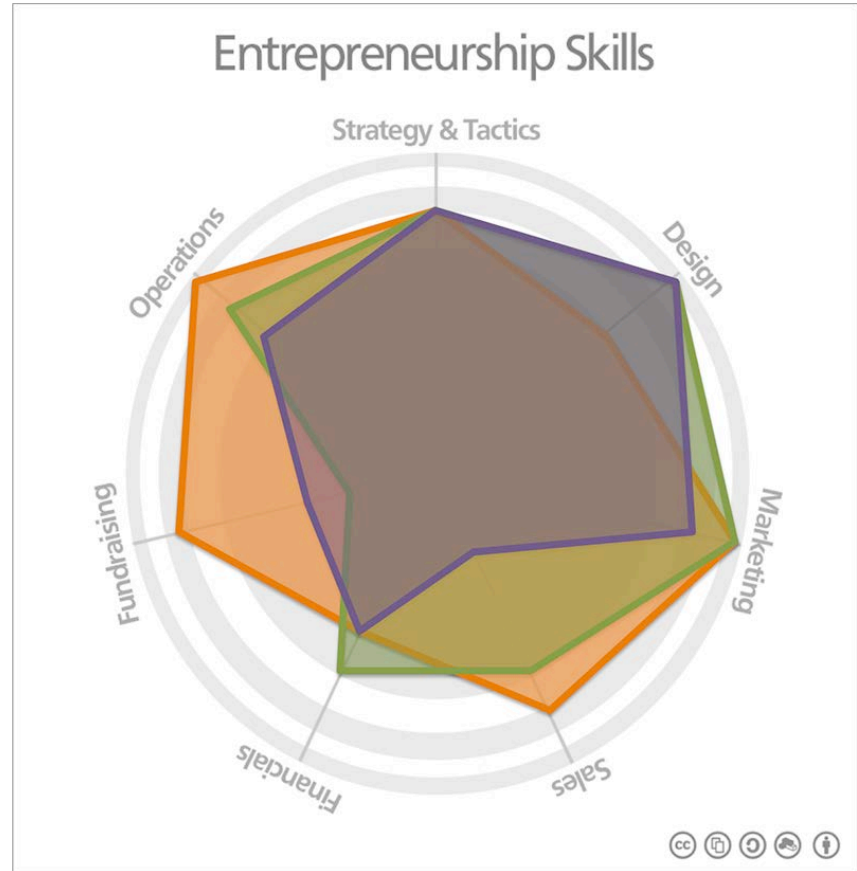

# FIXABLE?

**As an Angel, PASS.**

**As an Accelerator, ask if it's **fixable!****

# E.g. Skills

- Missing a skill?
  - An accelerator can teach a skill or two or three in two months

# E.g. Strategy

# E.g. Investorspeak

- How to talk to investors?

# More...

- Business Models
- Leadership
- Corporate/Legal structures
- Multi-national operations
- Franchise/License vs. Corporate

# NOT FIXABLE

Not every **yellow flag** is fixable

**What do the next  
3 pitches have in  
common?**

# E.g. Anti-Solar

- Anti-solar's panels provide passive cooling of your home or office, through the day and night.

## **E.g. Manna**

- Manna turns your dinner scraps into nutritious, dried, delicious, shelf-stable snack bars.

# E.g. Fusionary

- Fusionary is a safe and affordable fusion generator providing heat, hot water, and electricity for your home or office.

# In Common: R&D

- Beware the R&D pitch
  - Is there a prototype?
  - What is needed to turn the prototype into a commercial product?
  - How much time and money is needed?
  - What will the product cost?
    - Is that cost affordable?

# In Common: R&D

1. Prototype?
  2. Commercial product?
  3. Investment to market?
  4. Product cost?
- Anti-solar
    - Prototype
    - \$\$,\$\$\$,\$\$\$
    - Theoretically 10°F
  - Manna
    - I made it up
  - Fusionary
    - Many prototype companies
    - \$\$,\$\$\$,\$\$\$,\$\$\$
    - 10+ years
    - Unknown price, if ever

**What do the next  
3 pitches have in  
common?**

# E.g. Community Sourced Capital

- Small, 0% interest loans to local companies from their happy customers.

# E.g. Juabar

- Solar-powered kiosks to provide charging to the 67% of the residents of Tanzania with cellphones, in a country where 2% of the populace has access to the electric grid

# E.g. Personify

- Make donating time to charity as easy as donating money.

We Did it ! Thanks to everyone involved.

Add to the Conversation

Here's another snap I got guys, great team all round !

**Images**

**Our Team**

The screenshot shows the Personify website interface. At the top, there's a navigation bar with 'Login', 'My Account', and 'Inbox 3'. Below that, there's a profile picture of the organizer, Andrea T., and a map showing the event location. The map has a yellow star marker. To the right of the map is a section titled 'Images' with a grid of photos showing people at an event. Below the map is a section titled 'We Did it ! Thanks to everyone involved.' with a sub-section 'Add to the Conversation' and a photo of a group of people. At the bottom right, there's a section titled 'Our Team' with a grid of photos of the team members.

# In Common: Failure

- Startups fail
  - Half of all startups don't survive five years
  - 85% of venture backed startups run out of money
- You can't foresee what will go wrong

# In Common: Failure

1. Startups Fail
  2. Most startups fail
  3. You can't predict why any startup might fail
- Community Sourced Capital
    - Cost of acquiring customers
    - Competition
  - Juabar
    - Equipment failure
    - Raising capital in Tanzania
  - Personify
    - Took three years to launch
    - Ran out of personal runway

# **DUE DILIGENCE**

**The best you can do is ask questions**

# Due Diligence

## Angel / VC

- Why **not** to invest
- Legal corporation?
- Who is missing from the team?
- Commercial product?
- Financial model?
- No **red** or **yellow** flags?

## Accelerator

- Why **to** invite
- Can incorporate later
- 2+ people who can communicate?
- Prototype + Early sales?
- Sufficient market?
- **Fixable**?

One investor  
yellow flag?

# E.g. HERE

- The age-old ways to meet and do with neighbors is bulletin boards. HERE moves that information onto your smartphone, creating a social network of places.

# HERE: What Went Wrong

- Solopreneur
  - Found a co-founder but didn't work out
- Had an old co-inventor
  - Who sued for IP theft
- The investor liked the idea
  - An put **idea before business plan**

Invest in  
**PEOPLE and PLANS**  
not **IDEAS**

Lastly... remember...

**SHARK TANK**

is **REALITY TV**,  
not real investing
